GULL

gull.kinugawa-net.com

Untamed Blue

Rough yet silent, the sea is in a constant state of transformation. Within it, a primal instinct long buried within us awakens.

Drawn by the promise of what lies beyond our sight, we continue to dive deeper. Even in the same place, today's sea is never the same as yesterday's.

Changing conditions. Unknown terrain. Unpredictable moments. A wild order beyond human control sharpens our senses and pulls us toward the next experience.

The sea reveals its true form only to divers who challenge it. Beyond the step into the unknown, an untouched, a true ocean awaits

Izu Futo
Japan

On the seabed off Tomido, the reef is covered with a wide variety of colorful soft corals, with anthias and cardinal fish gracefully swimming around it.

BRAND POLICY / KINUGAWA

GULL

Rooted in Japanese Tradition.

Born in the heart of Tokyo from a shared belief among passionate divers: "Great equipment must be shaped by real diving".

Since its beginning, Gull has played a defining role in building Japan's diving culture, while continuously pushing boundaries and helping shape modern diving globally.

Each product begins in the hands of skilled craftsmen and is refined through repeated prototyping, then proven where it matters most: the sea.

Tested, broken, rebuilt, and tested again. Without fear of failure. This relentless pursuit gives birth to gear worthy of absolute trust.

Designed for demanding conditions. Built with carefully selected materials. Developed with an uncompromising mindset. This is Japanese quality, rooted in long tradition of craftsmanship.

From recreational diving to professional use, Gull delivers lasting durability and exceptional comfort. With every dive, it becomes more than just equipment, Gull becomes a trusted partner, strengthening your connection to the sea.

G Series

Ultimate in perfection

Driven by innovative technology,
breakthrough ideas, and original design,
G Series equipment is created with nothing held back.

Combining exceptional performance with refined,
beauty, and form, these products made an immediate impact,
quickly earning recognition as a top choice among professional divers worldwide.

“Ultimate in perfection”
To be uncompromising. To pursue perfection.
To continue delivering moments of surprise and excitement to divers.

This is the essence of the G Series, and the mission that defines it.

Equipment by Experiences They Provide, Not by Price.

Why Gull opened the premium market.

Nakai

— It Was Never About Creating a "Series" From the Start

Hoshino: To be honest, we didn't begin with the idea of creating a "G Series." It all started with a single mask, what would later become the MANTIS LV. At the time, most masks offered sufficient forward vision, but downward visibility was limited. We wanted divers to clearly see the "golden triangle". The chest area where gauges and controls are operated, without having to tilt their head downward. That idea marked the beginning of development.

Nakai: The MANTIS LV was the result of an intense collision between two demands: "We want improved downward visibility," and "If it doesn't look good, it's meaningless." We pushed the lenses as close as possible to the cheekbones to maximize downward vision, then adjusted the skirt shape to the absolute limit. Millimeter by millimeter, so nothing touched the face. Every single line, every fraction of a millimeter, was revised again and again.

Hoshino: At the same time, we challenged ourselves to give the lens itself added functionality. UV protection and amber lenses were common in eyewear on land, but unheard of in diving masks back then. Protecting the eyes at the surface, enhancing brightness underwater, we experimented relentlessly with glass processing to make it work.

Nakai: And finally, the MANTIS LV was born. It retained the iconic Mantis shape, but with a more refined design and a low-volume structure. Hence the name MANTIS LV (LV for Low Volume).

— Value Proven in the Field

Hoshino: The year before launch, we produced a special color and conducted test sales through active instructors across Japan. Honestly, we thought selling 200 units would be a success, but we received more than three times that in orders. Both our sales team and factory were shocked (laughs). The feedback was exactly what we had aimed for: "The downward visibility is incredible." "The amber lenses make the underwater world brighter." "The fit and sense of security are exceptional." That's when we knew this would be accepted by everyday divers as well. To build anticipation, we even featured only the silhouette in the previous year's catalog, hinting that something new was coming. At the time, masks priced around 15,000 yen were almost nonexistent. But we were confident that if function and design were truly aligned, the market would respond. The G Series became the catalyst that established the idea of "choosing masks by value, not price" in Japan's diving market.

— The Fusion of Design and Technology Created the G Series

Nakai: And of course, it didn't stop there. That's very Kinugawa-like (laughs). Requests kept coming in from sales: "There are carbon and plastic long fins, but no rubber ones. Let's make one". "We want a snorkel with zero breathing resistance". "Single-lens masks are trending. Let's make one that's functional and cool".

Hoshino: That did happen a lot (laughs).

Kouzou Nakai (left) Kazuhide Hoshino (right)

Nakai: Even when the requests felt impossible, the passion behind them was contagious. Eventually, we'd think, "Alright, let's do it," and dive into the design challenge.

Hoshino: We were working nonstop, giving up summer vacations and more. One thing I still remember clearly is Nakai saying, "The foundation the G Series took its current form. We make G Series products with the belief that they could genuinely change a diver's life.

— "Made in Tokyo" Trust

Nakai: Sometimes the requests from sales and planning departments feel unreasonable (laughs). But if we say "it can't be done," we'll never reach the ultimate. At our Tokyo factory, we use presses designed specifically for rubber fins, along with manufacturing methods developed in-house, with equipment and the know-how no one else has. When problems arise, we identify the cause, fix it, and apply the lesson to the next product. That accumulation is exactly what defines Gull's philosophy: Safe. Reliable. Authentic.

— The Environment and Future Challenges

Nakai: Recycling rubber products is still a difficult challenge. We're testing possibilities such as crushing materials for reuse in mats or slippers, but full commercialization will take time. At the same time, we're exploring hybrid materials and gear integrated with electronic support. Longevity and reducing environmental impact will be essential elements of future equipment.

Hoshino: Only a few percent of the ocean has been explored and only a fraction of people knows even that. If new technology allows more people to understand the sea, and if diving continues to grow worldwide, that's incredibly exciting to me.

— What Does "Ultimate" Mean to the G Series?

Nakai: Even what I consider my highest achievement is never truly "ultimate". The moment you reach it, you see what lies beyond. Human desire and craftsmanship have no end. If you declare, "This is the ultimate," growth stops. That's why we continue, building proof, gaining experience, searching for the next step demanded by the times, and moving forward again. To keep pursuing, that mindset itself is what "ultimate" means to the G Series.

Hoshino: I believe "ultimate" is not a destination, but an attitude. Even when you think you've reached the peak, there's always new space ahead. Perfection doesn't exist. But continuing to challenge ourselves, never losing passion, and striving to create something better, that process itself may be the true "ultimate" of the G Series.

Nakai: The harder the request, the more motivated we become (laughs). As long as we refuse to give up on making things even a little better, the G Series challenge will continue.

Hoshino

Kouzou Nakai - *Design & Factory Production Management*

A veteran engineer with over 50 years at Kinugawa. From zero-based design to mass production, Nakai is a master of precision and problem-solving. Never asking "Can it be made?" but "How far can we push it?"

Kazuhide Hoshino - *President & CEO*

With extensive experience in domestic and international sales and product planning, Hoshino brings a diver's intuition and global perspective to the G Series. He is driven by a passion to create products that truly serve divers.

LUVOS

LUVOS G-Metal NEW

The world's only single-lens metal frame mask that combines design and functionality.

LUVOS

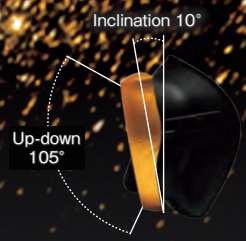

G-Metal

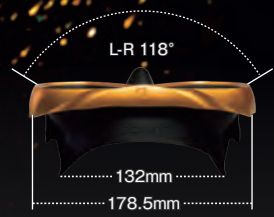

Majestic Gold

Volume: 170cc
Weight: 308g

Flow and Light Reflection

Maintaining LUVOS's proven performance, the aluminum frame leverages its texture and reflectivity to create dynamic light and shadow that shift with every angle, highlighting an elegant, refined brilliance.

Includes exclusive mask case.

Majestic Gold

※UV380 CUT AR IR lens is clear with reduced reflection.

A flagship model, embodying the very best of Gull's technology.

LUVOS

Designed entirely from the ground up, this mask and degree of lens reflection are meticulously engineered with the concept of “bright and expansive vision”.
Experience exceptional brightness and clarity-a true spectacle.

Mirror Ruby Red

UV380 CUT AR IR Lens

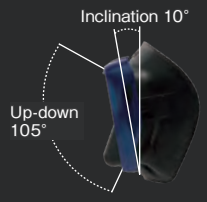

UVARIR

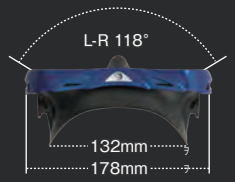

The lens features an anti-reflective UV380 coating for enhanced transparency compared to UV420 lenses. With anti-reflective (AR) processing on both sides, it ensures clear underwater vision. An added infrared (IR) protective coating helps minimize skin aging around the eyes.

Note: Clean the lens with your fingertips and a mild detergent only. Do not use sponges or abrasives, as they may damage the coating. After use, rinse with fresh water and gently wipe off any water droplets with a soft cloth. Leaving water droplets on the lens may result in water stains.

Lens Function ▶ P13

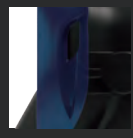

Volume: 170cc
Weight: 266g

Open View

LUVOS delivers Gull's largest single-lens view ever, with a 105° vertical and 118° horizontal field of view. Rivaling visibility of frameless masks.

Aquadynamic Frame

The aquadynamic frame channels water flow to reduce drag and ensure smoother, more efficient swimming.

Comfort-Fit Technology (PATENTED)

Reinforced Damper

Reinforced dampers secure the skirt edges to maintain a tight seal, preventing leaks even during strong facial movements.

3D Leak Guard

The skirt's 3D inner surface is engineered to maintain a secure seal along the laugh lines, even when clenching a regulator.

Easy-Pinch Nose Pocket

Newly designed nose pocket allows easier pinching for equalization, with widened gaps for easy access even with thick gloves.

LENS FUNCTION 3 High-Performance Lenses

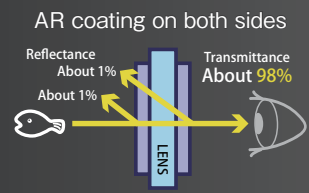

UV AR IR

● UV380 CUT AR IR Lens **UVARIR**

The clear UV380 lens has double-sided AR coating for a clearer, more natural view and blocks IR rays to protect skin from photoaging.

UV420 AR

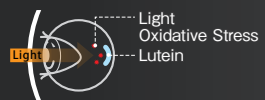

● UV420 CUT AR Amber Lens **UV420AR**

Blocks UV and HEV light to help protect lutein, which is essential for vision. Amber tint enhances contrast, making objects easier to see and more clearly defined.

※Lutein, an essential retinal pigment, blocks harmful light and offers antioxidant protection against macular degeneration. It must be obtained from the diet as the body cannot produce it.

UV420 Cut Lens Protection

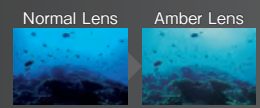

Light causes oxidative stress and lutein deterioration.

Ordinary Lens

Exposure to light causes oxidative stress, causing lutein degradation.

Amber Lens Difference

Appears brighter.

※Photos for illustrative purposes.

SC

● Super Clear Lens

By minimizing impurities in the glass, objects appear clearer than with standard glass. When used with a clear silicone body, it reduces lens reflections and internal glare.

OPTICAL LENS

Accepts Optical Lenses ▸P22～23

Optical lenses ranging from ready-made to custom options to match your specific eyesight.

Super Bullet

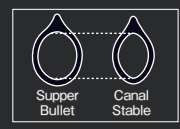

Able to withstand harsh conditions: tough with refined performance Gull's high-spec, top-of-the-line snorkel.

Length: 405mm
Volume: 180cc
Weight: 186g
Inside Diameter: 21ϕ

21 Bore Pipe

The large bore pipe enables high-volume airflow and the smoothest air intake of all the Gull snorkels.

Stabilizer Pipe

Sleek, streamlined pipe has less drag. Less drag means less tube shudder and less discomfort from tube shift.

Movable Mouthpiece

Freely adjust the angle to easily find the most natural, comfortable position for you.

One-Touch Holder

To easily detach from mask strap, simply squeeze the sides of the clip.

Twin Purge Valves

With two the purge valves, water clears faster, and any remaining water is diverted from your mouth, making the snorkel easy to clear, even with a larger bore tube.

Black

One-Hand Easy Grip Strap

Spring strap is fixed with a finger handle minimizing the hassle of donning and doffing, even when wearing thick gloves.

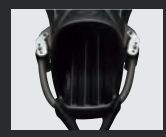

Adjustable Spring for Precise Power

Adjustability of up to 4cm for better fitment and more reliable propulsion.

Dry Suit Compatible Foot Pocket

GT's dry suit-compatible foot pockets feature large openings and internal grooves for easy insertion and removal of nearly any drysuit boot.

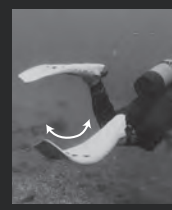

Instant Power

GT offers instantaneous extra torque power when you most need it. Great for diving with a heavy load, battling tough currents, performing quick getaways, and aiding incapable divers get to shore safely.

Semi-Long, Wide Blade Stability

GT fins use exclusive Kinugawa rubber for flexible power transfer. With a bending point near the foot pocket, they move more water per kick, delivering immense thrust while jet holes stabilize the blade.

Jet Hole Stabilizers

As pressurized water exits conventional jet holes, it immediately disperses into the surrounding water. Gull's patented jet hole stabilizers act as a water flow guide, delaying the dispersal of water, leaving an area of lower pressure behind the fin for your kick to pull out more efficiently.

FUNCTION

Gull masks offering comfort underwater. Each meticulously engineered to provide ample visibility and function.

Curled Lip
The skirt incorporates a curled lip, providing an effective seal that is less likely to leave impressions on your skin.

Super Clear Lens
Provides a clearer, truer view than standard glass. An ultra-pure, highly transparent lens lets you see objects sharply. Prevents reflections further when paired with a clear skirt.

Optical Lens Compatibility ▸P22~23
Optical lenses ranging from ready-made to custom options to match your specific eyesight.

Drain Skirt
The drain skirt design improves water expulsion during mask clearance and minimizes water pooling.

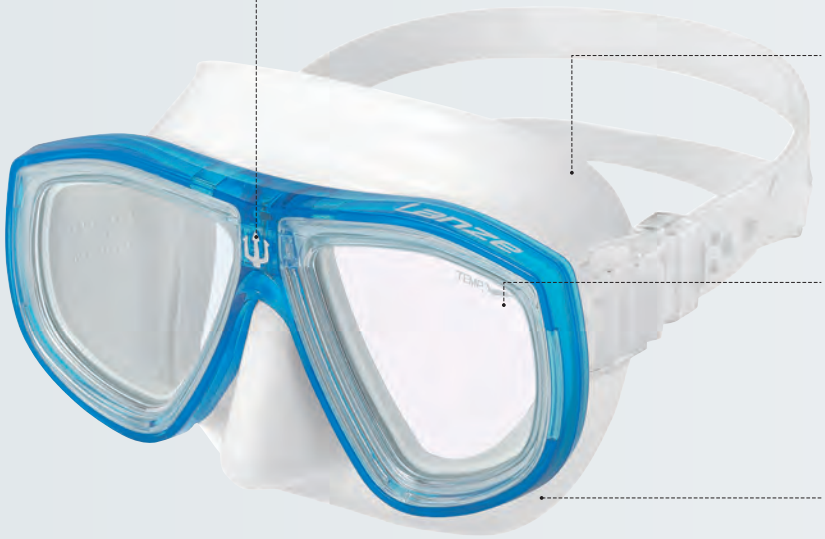

Soft Damper
Masks designed to enhance downward vision often press harder on the cheekbones from pressure and frame shape. The soft damper eases this stress for a more comfortable fit.

DX Spec Mask Buckle
A release button and fine adjustment increments allow easy one-handed band adjustment, even with thick gloves.

Interlock System
This design presses the frame at the central bridge and secures the lens with a screw. The double hold keeps lenses firmly in place, providing extra security in emergencies.

Skirt with Built-in Strap Clip
The design, featuring a strap pulled from the skirt and curled lip edges, ensures a secure seal with a soft fit that minimizes marks.

UV Care Lens
Gentle on the eyes, blocking an average of about 45% of UV-A rays. Clear like natural glass with no tint, they provide a bright, clear view, keeping underwater vision natural while offering UV protection.

UV Rays
- UV-A: Passes through the ozone layer, accumulates in the eyes and can be harmful.
- UV-B: Mostly absorbed by the ozone layer; some reach the surface and can harm the eyes.
- UV-C: Fully absorbed by the ozone layer; does not reach the surface.

Leakless System
The skirt wraps the cheekbones, flexing with facial movement to reduce mask shift, gaps, and leaks.

MASK

Since 1955, our technology and quality have earned the trust of countless divers.
MADE IN JAPAN, meeting the high expectations of divers who put quality first.

Easy and Quick Attachment or Removal with One-Touch Strap Adjustment.

If you use the strap in a Gull products set, such as with the Mantis and Mantis 5, you can enjoy one-touch strap adjustment.

Special Design to Prevent Slippage During Work.

The strap is angled for anchoring with a helmet fixing strap. This enables a secure fit with the helmet.

Developed in collaboration with specialist users, the Mask Band Long DX is a professional-grade product refined and tested exclusively by GULL.

			【+diopter】 to S+C = +5.00 (C value to +3.00)	

※3 Production is not possible when S + C is 10.25 or greater.
※4 Not compatible with Lanze.
※ Normally, correction for PD from 55 mm to 75 mm can be provided, but if "plus" cylinder correction for astigmatism is required, PD setting is not possible.

※Single lens masks also compatible with section-applied optical correction. Contact dealer for more information.

Required Information for Order-Made Lenses

※When obtaining your prescription, inform the optometrist that the lenses will be used for diving.

Corrective Lens Prescription

Date: _____Year _____Month ___Day

	Spherical Lens	Cylindrical Lens	Cylinder Axis	Base	Naked Vision	Corrected Vision	Total Vision
R	① D	② D	③ ○				
L	D	D	○				

④ For distance ⑥ Pupillary distance mm(Left mm,Right mm)

	Spherical Lens	Cylindrical Lens	Cylinder Axis
R	D	D	○
L	D	D	○

※Required for bifocal lenses.

⑤ For middle distance For reading Pupillary distance mm(Left mm,Right mm)

Information Required for Corrective Lens Orders.

① SPH (S) – Spherical lens: negative (–) for nearsightedness, positive (+) for farsightedness.
② CYL (C) – Cylindrical lens for astigmatism.
③ AX (Axis) – Cylindrical axis, 0°–180°.
④ Distance lenses – "for distance"; near lenses – "for reading" (sometimes ADD).
⑤ PD – Pupillary distance between pupil centers; total or separate for each eye.

Ordering Guidelines

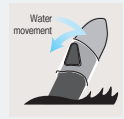

① The range is limited when S and C values are [–] & [+] or [+] & [–]; please confirm with your dealer before submitting your prescription.
② When ordering, include a valid prescription from an optometrist. Orders without a proper prescription may not be accepted.
③ Gull custom lenses do not support prism correction or specified E.P. (Eye Point).
④ Once an order is placed, cancellations, changes, or exchanges of completed items are not possible

FUNCTION

Snorkels for a wide range of snorkeling and diving activities.

Dry Upper
Design prevents splash from entering the end of the snorkel.

Stabilizer Pipe
Streamlined tube reduces vibration and discomfort from tube shift.

18 Bore Pipe
Thickness of pipe and bore diameter are designed to facilitate relaxed, easy breathing.

One-Touch Clip
It is easy to attach and detach the snorkel by squeezing both sides of the clip.

Exclusive Mouthpiece
Vertically asymmetrical grips align with the natural contours of the upper and lower teeth for a secure fit. Offered in two sizes: large and small, to help minimize jaw fatigue. Remains comfortable even during extended use.

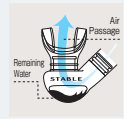

Smooth Drain
Internal corrugations along the inside of the curve allow the tube to flex for a comfortable mouthpiece fit. The opposite inner wall is smooth, for water to drain quickly and efficiently.

Replaceable Mouthpiece
Mouthpiece is detachable and replaceable.

Large Drain Chamber
Even when water is present, it keeps the airway clear and prevents backflow into the mouth.

SNORKEL OPTIONAL PARTS

FUNCTION

Gull offers rubber fins for all levels, from full-foot fins that extend the body to versatile strap fins for any diving.
Whether in wetsuits or drysuits.

FINS / FULL FOOT

Boot Pocket for Secure Fit & Easy Wear

Designed for a stable, comfortable fit, the boot pocket features an extended sole, higher instep, and slip-resistant toe structure. Optimized for Gull boots, it ensures easy donning and doffing while enhancing overall comfort.

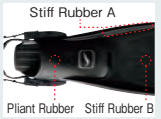

Ribs to Firmly Catch Water

Precisely matched front and rear rib height improves rebound, reduces lateral slip and torsion, and delivers powerful propulsion on every kick.

Hybrid Rubber

Different rubber densities are used in the foot pocket, blade, and ribs to provide flexible yet powerful and resilient propulsion.

V-Shaped Blade Tip

Ensures quick water release, enabling faster, smoother, and more efficient fin strokes for sustained propulsion and precise control.

Superior Grip

The backside features a unique block pattern that provides strong grip in all directions, forward, backward, and sideways, enhancing both safety and ease of use.

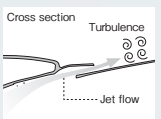

Protruding Blade Tip

Generates reliable thrust even with a light kick. Prevents power loss during strong kicks and efficiently converts force directly into forward propulsion.

Jet Hole

The jet holes channel turbulence backward during kicks, enhancing propulsion. Features a wider inlet and narrower outlet to create a stronger water flow.

3D Pocket

With a 3D pocket that hugs the Achilles, these fins reduce looseness and hold your foot securely feeling like natural extensions of your legs.

Side-Slip Stoppers

Provides reliable grip on uneven surfaces, such as boat dives or rocky entry points.

Ribs to Firmly Catch Water

Precisely matched front and rear rib height improves rebound, reduces lateral slip and torsion, and delivers powerful propulsion on every kick.

Hybrid Rubber

Different rubber densities are used in the foot pocket, blade, and ribs to provide flexible yet powerful and resilient propulsion.

V-Shaped Blade Tip

Ensures quick water release, enabling faster, smoother, and more efficient fin strokes for sustained propulsion and precise control.

Easy-Entry Pocket

A soft, thinner rubber around the pocket opening ensures easy on-and-off, even for first-time users.

Rounded Blade Tip

Designed to capture water efficiently during fin kicks, it harnesses the rubber's rebound elasticity to generate powerful propulsion.

FINS / STRAP

PRODUCT COMMITMENT

The Soul of Skilled Japanese Craftsmanship

Kinugawa Rubber

Born from One of Japan's Top Rubber Manufacturers.

Now trusted by divers all around the world, Gull's made in Tokyo production history began in the rubber industry as Kinugawa.

Kinugawa initially produced rubber automobile parts such as weather strips and other sealants. It wasn't until 1955 when it began shifting focus to manufacturing diving equipment exclusively in Japan, helping to pioneer the diving industry domestically. Its reputation continued to grow and in 1964, was entrusted the deed to produce O.E.M. diving equipment for a renowned international brand.

The company name was changed in 1967 to "Kinugawa Pacific" marking a new mission; "To make the world's best masks, fins, and snorkels from Tokyo".The production and innovation of high-quality equipment led to the birth of Gull in 1983.

Why Natural Rubber?

Through rigorous testing of different materials and after repeated trails, it was decided that natural rubber is best for fins. Unlike synthetic rubber, natural rubber exhibits excellent propulsive force with high elasticity giving Gull fins their signature feel and performance.

Natural rubber can be modified to make a variety of fins that accommodate to all skill levels. Shorter-blade fins with a softer rubber compound are easier to control and allow for suitable propulsion with lighter kicks, while longer blades with stiffer rubber compounds display higher propulsion.

Varying rubber compounds can also be blended together offering softer and stiffer properties where needed. An example is the use of a softer compound at the heel for easier wear and removal.

No Pair the Same

Kinugawa is challenged by working with an organic material. The rigidity and color of natural rubber are subject to factors such as country of origin, year of collection, and climate during production. Hence, there may be slight inconsistencies from pair to pair.

Manual processes such as blending and kneading of the natural rubber stabilizes and prevents deterioration of the material. These procedures are constantly being adjusted depending on climate and humidity to best achieve consistent firmness and elasticity.

The coloring of natural rubber-based products subject to molding by high pressure and heat of several hundred degrees requires complex techniques and advanced labor. It is solely Kinugawa whose technology and experience is capable of producing the vast array of colors.

These multifaceted handmade processes of natural rubber refinement results in slight variances of color, texture, and shape even for the same product, making every pair truly unique.

Manufacturing Process

Raw Materials	Kneading	Aging & Cutting	Compression Molding (Vulcanization)	Trimming	Inspection	Packaging
Only high-quality natural rubber with few impurities is used.	Kneaded with a precise formula for quality, durability, and elasticity.	It is then aged to fortify its properties, then cut into blocks for pressing.	The blocks are then put into the molding press for up to over 10 minutes.	Excess rubber is hand trimmed, defining the fin's shape.	Each piece is checked manually by experienced staff.	After inspection, fins are packed and ready to ship.

○ **Appropriate Fit**: Fits well and secure.
▲ **Tight Fit**: Heel feels very securely kept, but may be difficult to don and doff.

SUPER MEW XX

SUPERMEW XX

These top-spec strap fins achieve the same feel as their full-foot counterparts.

Based on Super Mew, these strap fins have a shortened blade for improved performance and ease of movement, suitable for wetsuits (23–30 cm) and dry suits (22–28 cm).

User & Safety Friendly Fin Bottoms

Superior Grip
Complementing the all-over thickening of the sole, grip is improved with a new tread pattern.

Hyperdimple System
Suppressing turbulence, dimples send more kick power into propulsion.

Water-Flow Smoother
For more efficient propulsion, water is effectively channeled rearwards rather than to the sides.

Optimized Blade Length

Retaining the easy-to-swim width of the Super Mew, the blade is shortened to improve maneuverability.

Sole Design to Transfer Power to Tip

Slightly thicker sole absorbs strong kicks and efficiently transfers power to the blade tip.

Super Mew XX Boot Size Table

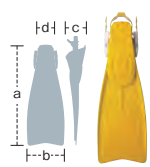

※Compatibility with soled and dry boots varies by size. Check fit in-store before purchase.

Size	GS Boot	Felt Sole Boot	Dry Boot by Other Makers (World Dive／Mobby Dick)

SUPER MEW XX DRY

Made for drysuits, it delivers a light, responsive kick maintaining the signature XX flex for exceptional comfort as a dry fin.

Uses higher-density rubber (+250 g) with a center of gravity at the ankles for balanced, weight-free dry suit diving. Its unique tip shape helps water flow for a lighter kick, ideal for those who find Mantis Dry Fins heavy.

White

Moon Yellow / Black / White

GF-2453A	M	M	M
GF-2452A	L	L	L
GF-2451A	XL	XL	XL

※Spring strap sizes vary by fin size: M comes with XS, while L and XL include S as standard.

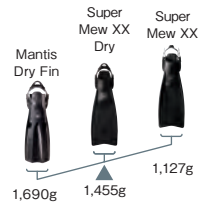

Single-Hand On/Off Spring Strap

Eliminates adjustment hassles when wearing a dry suit and allows easy fin donning and removal. The pull tab is designed for easy finger access, for smooth operation even with gloves.

Weighted Rubber

Weighing 250g more than the Super Mew XX, with a center of gravity below the ankle for more stable underwater balance. Ideal for divers who find Mantis Dry Fins too heavy.

M Size Weight Comparison

GF-2332C ····· L ····· L

Lightweight & Compact

A shorter blade improves maneuverability and reduces weight, while the compact design is gentler on marine life and makes donning, doffing, and carrying easier on land or on boats, enabling smoother and more comfortable entries and exits.

A Middle-Range Blade

The blade is shortened to reduce rubber flex time, delivering a lighter, more efficient kick. Lowering the underside keel height maximizes the resilient flex characteristic of a mid-range blade, for a more responsive and satisfying kicking feel.

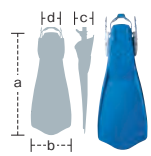

Long Sole & High-Instep Boot Pocket

The extended sole and higher instep securely wrap the foot, efficiently transferring leg power for strong, resilient propulsion.

Mantis Dry Fin w/ Spring Strap

GF-2275C ····· S ····· S ····· S ····· S
GF-2273C ····· M ····· M ····· M

※Spring strap sizes vary by fin size. S is equipped with XS, while M come with size S as standard.

Mantis Dry Fin vs Mantis Fin

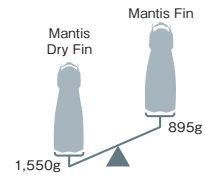

Left: Mantis Dry Fin
Right: Mantis Fin

Upper: Mantis Dry Fin
Lower: Mantis Fin

Boot pocket is enlarged for easy donning and doffing. While the fin has added weight to eliminate the need for ankle weights, it is recommended for divers with strong leg power who seek greater propulsion.

S Size Weight Comparison

Higher sole density lowers the center of gravity below the ankle, ensuring more stable underwater balance. Comparable to using 0.5kg ankle weights.

Weight (per piece)
S: 1,550g
M: 1,690g

BIO-MERGE SYSTEMS

THE BEST EQUIPMENT TO SUIT ALL YOUR NEEDS.

As visitors to the ocean, our bodies require both protection and adaptability to the underwater environment.
To snorkel or dive safely, it is essential to have the best tools available and equipment suited to your diving style.
Since 1955, Gull has been a pioneer in creating high-quality, stylish equipment,
backed by a long history of research and development. As an industry leader, Gull continues to drive innovation.
Gull has developed products that protect divers from head to toe—a second skin, if you will.
This premium line of protective gear is called Bio-Merge Systems.

ADVENTURE SPORTS ARE ALL ABOUT A BALANCE OF AWARENESS, KNOWLEDGE AND FUN. EXPLORE YOUR LIMITS AND PLAY SAFE.

BOOTS BIO-MERGE SYSTEMS

Gull boots are designed to complement Gull rubber fins and support finning movements. Select the pair that suits your diving needs.

UNISEX *GULL STANDARD BOOTS* NEW

A standard boot designed to fit GULL fins.

Black

Navy

GA-5657A GULL Standard Boots

○ 3mm neoprene + Standard jersey ○ With zip fastener

Designed for high insteps and wide feet, with a U-shaped ankle cut to reduce strain.

Sewn on both sides (dotted lines) to prevent rubbing and blisters.

Gull's exclusive instep stabilizer securely holds the foot and prevents side-to-side movement.

Anti-slip sole prevents falls and injuries on boats.

Size	XS	S	M	L	XL
Hand(cm)	17	19	23	25	27

3 SEASON GLOVES

New all-around gloves suitable for three seasons. Offers excellent durability and comes in five sizes, allowing you to choose the best fit for your hands.

Logo located on side of wrist.

Black Navy Shell Blue Pink

GA-5500A
3 Season Gloves

- Material: Amara (synthetic leather) & 2mm Opelon® jersey
- Includes hook for storing as a pair
- Size : XS, S, M, L, XL
- Pink only for XS, S, M

3 SEASON GLOVES SHORT

Versatile three-season gloves with a wide opening and shorter length for easy wear and removal.

Black Shell Blue

GA-5501A
3 Season Gloves Short

- Material: Amara (synthetic leather) & 2mm Opelon® jersey
- Includes hook for storing as a pair
- Size : XS, S, M, L, XL

UNISEX *SUMMER GLOVES* NEW

Russell mesh provides excellent air transmission and quick drying. Even easier hand mobility, suitable for fine fingertip maneuvering.

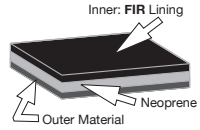

Black Navy Shell Blue Pink

GA-5502A
Summer Gloves

- Material: 2mm polyester mesh (Russell mesh) & Amara(synthetic leather)
- Includes hook for storing as a pair
- Size : XS, S, M, L, XL
- Pink only for XS, S, M

UNISEX *WINTER GLOVES Series*

Far Infrared (FIR) Fleece

Lined with highly insulating Far Infrared (FIR) fleece, which absorbs body heat and radiates it as infrared energy for superior warmth.

Unisex	S	M	L	XL
Hand(cm)	21	23	25	27

5mm WINTER GLOVES

Thermal Insulation

5mm boot with FIR fleece lining and double-layer wrist seals to block water and retain heat.

GA-5583 5mm Winter Gloves

- Black: S, M, L, XL
- Material: Palm: 5mm Opelon Jersey + FIR fleece
  Wrist: 2.5mm Jersey + Opelon Jersey (Exterior)
  2.5mm SKIN + Opelon Jersey (Interior)
- Non-slip palms offer grip when holding ropes or ladders.

Water Block Ring

Two-layer construction blocks water entry at the wrists. Both inner and outer layers consist of 2.5mm thick fabric.

WINTER GLOVES

Warmth & Easy On/Off

These 3mm gloves provide excellent warmth and feature a wrist fastener for easy on and off.

GA-5541C Winter Gloves

- Black: S, M, L, XL
- Material: 3mm operon jersey + FIR fleece
- The wrist fastener makes these gloves easy to put on and take off, even for beginners, and ideal for drysuit use.

Stretch Jersey used on wrist area for easy wear and removal.

SKIN HOT GLOVES

Warmth & Mobility

The thin 2mm gloves provide warmth while allowing precise finger movements.

GA-5539A Skin Hot Gloves)

- Black: S, M, L, XL
- Material: 2mm mesh skin + FIR fleece
- Snug fit with minimal skin friction. The mesh-skin exterior ensures a non-slip grip, for delicate tasks like handling cameras or operating drysuit valves.

Pull tab for easy removal; offset seams reduce tearing.

※Skin fabric may be damaged by fingernails on wear or removal. Handle with care.

BLACK ELEMENT

Wear the Core. Ride the Element.

For every ocean. For every style.

BLACK ELEMENT features a monochrome-based design and exceptional versatility. Performing just as well as a standalone piece or as part of a layered system. Adapting to changing conditions and diving scenarios. A wetsuit line to express your style, for wherever the sea takes you.

SKIN SUITS BIO-MERGE SYSTEMS

MEN'S WOMEN'S

Skin suits use soft, highly stretchable material for easy on and off. With wind-resistant insulation and FIR linings, the suits provide reliable warmth both in and out of the water.

Trubeaute™

Trubeaute®
Anti-Photoaging

Blocking near-infrared rays helps fully protect the skin, which UV protection alone cannot achieve.

Impact of Near-Infrared Rays on Skin

Near-infrared rays penetrate deeper than UV rays, reaching the dermis and subcutaneous tissues. Sunlight causes wrinkles and sagging: UV-B affects the superficial epidermis, UV-A damages collagen and elastin, and near-infrared contributes to deeper tissue aging.

UV & Near-Infrared Rays in Sunlight

UV rays make up about 6% of sunlight, while near-infrared rays account for 42%, making protection against near-infrared essential to prevent skin aging.

SS/SN | Smooth Skin x Stretch Jersey

Stretchy Smooth Skin Fabric

The exterior utilizes Extra stretchy SS material while the inner SN lining reinforces durability especially at the joints.

Gull Equipment and Travel? A Suitcase Made for Divers.

HARDSHELL SUITCASE

A large-capacity durable hardshell suitcase capable of storing all diving necessities. Its elongated form allows for fins to be placed without bending.

NEW COLOR

Ocean Blue

Lightweight Durable Elongated Slim Profile

Made of a lightweight yet sturdy polycarbonate mixed resin. Its slim lengthened form also allows for safe fin storage.

※Capable of loading up to Warp Fin XL.

Multiple Handles

Handles are located on the top, side, front, and bottom to facilitate carrying in a variety of ways.

Dual Wheel Casters

Dual wheel casters are great at noise reduction and provide excellent stability. A new elastomer-based material is used to further improve noise reduction and durability, enabling smoother rolling.

TSA Rotary Locks

Fastened with two stainless steel TSA rotary locks. The locks offer a secure seal compressing the shells together.

How to Open

Set the lock tab vertically.

Lightly grip the tab.

Rotate clockwise by about 180°and the fastener will unlatch. Rotate counter-clockwise to relatch.

When unlatched, pull to open.

NEW COLOR

Sand Beige

Black

Large 150L Capacity

Facilitates storing a full array of diving equipment from wetsuits to heavy gear. Also capable of storing gear in combination with mesh bags, recommended for international travel.

Easy to Use Inner Construction

Interior consists of ample compartments with cross belts for secure fastening. The red coloring on the interior makes it easy to find smaller items such as equipment parts.

Limited

GB-6506C

Hardshell Suitcase

- Body Material: Polycarbonate mixed resin
- Exterior Dimensions: H78 x W42 x D38cm
- Interior Dimensions : H73 x W41 x D37cm
- Weight : 6.1kg ○ Capacity: 105L

MESH BAG

Easy for moving your diving gear and also great for hotel and beach life, for just carrying things around while you' re on land between dives.

MESH CARRY BAG

A mesh bag that can carried in three ways: as rolling bag, backpack, or shoulder bag.

Black

GB-7150A
Mesh Carry Bag

- ○ Back
- ○ W70 x D35 x H35cm
- ○ Capacity: approx.85L
- ○ Weight: approx.1.5kg
- ○ Double zipper design
- ○ Side pocket for smaller items
- ○ Neoprene on shoulder straps provide a soft point of contact.
- ○ Detachable shoulder belt

Protective Wheel Cover

The wheel cover prevents dirt from transferring to the body when worn as a backpack.

Double Zipper

This large-capacity mesh carry bag allows for the storage of a full range of equipment. The double zipper design provides a wide opening for convenient access.

3-way use

More than just a standard mesh bag—pulling the side bands transforms it into a carry bag, and it can also be worn as a backpack for versatile 3-way use. Designed to protect and transport equipment efficiently, even when traveling on public transportation.

CUBAPRO

KINUGAWA INFORMATION

We at Kinugawa believe in sustainable activities to protect our oceans.

Team Chura Coral

Coral deterioration from rising water temperatures and bleaching has surged. Founded in 2004, Team Chura Coral brings together local and national businesses to restore Okinawa's reefs through coral planting. Supported by Onna Village Fisheries Cooperative, the Japanese Ministry of the Environment, and Okinawa Prefecture, the initiative promotes the message "Value the Chura ocean" while conserving biodiversity and supporting tourism.

Kinugawa Product Guarantee

We provide warranties (covering aftercare such as repair or replacement) according to our standards for each Gull product including masks, snorkels, and fins. Refer to the warranty included with your new product for detailed information.

Customer Consultation / Technical Center (Japanese only)

0120-055-510

Hours: 9:00–12:00 / 13:00–17:00 (Weekdays)

❶Customer Consultation: General product inquiries
❷Technical Center: Inquiries about inspections, maintenance, and overhauls of equipment Applicable brands: GULL, AQA, SCUBAPRO, SHEARWATER

※Please note that depending on business operations, we may respond via voicemail.

Community Partnership

Since 1955, based in Tokyo, we have focused on producing quality diving gear while fostering strong ties with our local community. By employing local residents and using our Head Office showroom as a hub for engagement, we aim to grow sustainably alongside the community that has supported us from the start.

SPECIAL THANKS

Cover・P2～3・P27(Underwater)・P32(Underwater)・P33・P44 Photo
Nature photographer Kirin Sekito
In my freelance photography, through landscapes and underwater photographs, I seek to convey the beauty of nature to people all over the world. I constantly take pictures of beautiful scenes in Japan to show people everywhere just how beautiful it is on these islands and in the surrounding seas.

KINUGAWA QUALITY since 1955

Uncompromising quality for over half a century. Reliance that breeds new trust. Kinugawa has continued to refine technology for safety and durability in production in Japan. And no matter what location where we make our products, we will never make any compromise in quality. Testimony to this trust is Kinugawa quality.

SAFE, RELIABLE, AUTHENTIC. KINUGAWA
